DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 30th, 2004 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claimss1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Felkey et al (U.S. PG Pub 2002/0161667) in view of Nicastro et al (U.S. Patent No. 2004/0015367).

5. As per claims 1, 7-15 and 21-26, Felkey et al teach a method for providing procurement services to a plurality of customer companies, comprising establishing a user profile for each person authorized by a customer company to access the procurement services including a vendor catalog, a blanket order procurement contract for goods or services, a user profile table, costs centers, and accounting general ledger codes with company group specific accounting rules and defaults, associating each the company with a company group of related companies, the user profile specifying for each the user a user company and company group, providing for each procurement resource to be shared among the users a resource profile specifying for each resource those the companies to have access to the procurement resource; and responsive to the user profile and the resource profiles, controlling user access to the procurement resources (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*). Felkey et al fail to teach an inventive concept of providing common code defining workflow components common to all companies within the company group including accounting validation and approval processing. However, Nicastro et al teach an inventive concept of providing common code defining workflow components common to all companies within the company group including accounting validation and approval processing (*see paragraph 0153*). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the inventive concept of Felkey et al to include Nicastro's inventive concept of providing common code defining workflow components common to all companies within the company group including accounting validation and approval processing because this would have provide a more efficient system.

6. As per claims 2 and 16, Felkey et al teach a method further comprising providing the procurement resources in a front-end catalog and requisition server (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*).

7. As per claims 3 and 17, Felkey et al teach a method further comprising receiving a user request from a first client browser to log in to the front-end server; responsive to the request, providing a user interface at the client browser only to procurement resources authorized by the user profile and the resource profiles (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*).

8. As per claims 4 and 18, Felkey et al teach a method further comprising receiving requests from a plurality of users authorized by different company groups to enter a requisition to a vendor with respect to the same catalog or contract resource; and generating separate purchase orders to the vendor with respect to requisitions originating with users from each the company group (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*).

9. As per claims 5 and 19, Felkey et al teach a method further comprising the steps of: leveraging procurement buys from a plurality of company groups with respect to the same volume specific contract for goods or services (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*).

Art Unit: 3621

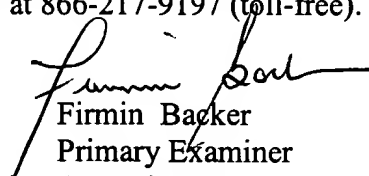

10. As per claims 6 and 20, Felkey et al teach a method further comprising allowing the user to apply procurement charges to charge centers only within his company group (*see abstract, figs 1, 2, 4, 5a-6a, paragraphs 0012, 0015, 0037, 0046, 0047, 0064, 0051, 0058, 0088*).
